

ACME GLOBAL MARKETS - INTERNAL ORDER ROUTING STRATEGY (CONFIDENTIAL)

Effective Date: January 2026

Section 1: Retail Order Handling Policy

All non-directed customer equity and option orders handled by Acme Global Markets must be evaluated for optimal execution quality.

Pursuant to internal strategy directives, our primary routing venue for NMS options will be Citadel Securities and Virtu Financial.

Section 2: Payment for Order Flow (PFOF) Transparency

Acme Global Markets maintains structural revenue-sharing arrangements with specific designated market makers.

For retail equity orders routed to Apex Clearing, Acme receives a flat-rate rebate averaging \$0.0015 per share.

All matching arrangements must be fully audited and reconciled to meet quarterly SEC Rule 606 public reporting requirements.
